## Experience

### ■ Lead Frontend Developer @ Xyro

1 yr 9 mos (Jan'23 — Sep'24)

Gamified crypto-trading platform #startup #web3 | Remote, full-time

Project: [xyro.io](https://xyro.io)

Stack: React, TypeScript, Apollo Client (GraphQL), RadixUI, Trading View Charts, ThirdWeb/Wagmi, FSD

- Developed key features:
  - 3 gaming modes, while maintaining and enhancing all 5
  - Fast and seamless realtime price chart [Demo ▶](https://bit.ly/cv-demo-1)(<https://bit.ly/cv-demo-1>)
  - Complex authentication flow: OAuth, Web3, Referral codes and login by NFTs
- Created documentation and screen recordings to enhance team understanding of the code
- Designed a flexible architecture (FSD) and selected the technical stack for the application
- Ensured the consistency of the design system despite change of the design team, project pivot, and transition to a mobile audience
- Increase team's DevEx by implementing AI tooling, unit testing, linting, formatting and utilizing bots for easy PR reviews and task assignments

### ■ Frontend Developer @ Vilantis.ai

8 mos (Apr'22 — Dec'22)

European outsource company | Remote, contractor

Projects: service for American clinic patients ([next-health.com](https://next-health.com)), website with statistics of Lithuanian companies ([statometras.lt](https://statometras.lt))

Stack: Nuxt.js, Next.js, React, Vue, Charts.js, GraphQL

- Developed complex booking forms for consultations and treatment appointments
- Accelerated development and maintainability:
  - Implemented strict typing via `JSDoc` without transitioning to `TS` to reduce amount of new bugs

- Simplified the integration of a new API by implementing auto-generation of types from the backend
- Updated the legacy project (Nuxt2/JS) for better compatibility with libraries and documentation

## ■ Frontend Developer @ 12 Storeez

1 yr 5 mos (Aug'21 — Jan'22)

*Clothing brand with online store | Remote, full-time*

Project: internal logistics service for managing order delivery across multiple countries

Stack: Angular (13), Nx, NgRx, RxJS, gRPC, Material UI

- Developed a frontend for the internal logistics service from scratch
- Conducted team retrospectives → made it easier to prevent burnout and acknowledge improvements
- Improved the accuracy and speed of the team's poker planning (15 minutes instead of 30+)
- Organized product demos with stakeholders, which clarified requirements prior to release
- Curated and updated the backlog for feature prioritization

## ■ Frontend Developer @ Semrush

1 yr (Aug'19 — Jul'20)

*Leading online visibility management SaaS platform | Office, full-time*

Project: internal service for setting goals in company units (similar to OKR)

Stack: React, Redux, TypeScript, D3.js

- Developed an interactive organizational structure with a map of departments and teams (D3, React)
- Optimized the sprint planning estimation approach and implemented it with an Agile coach

## ■ Markup Developer @ Noveo
