👋 Hey there! I'm a seasoned Frontend Developer specializing in `React` and `TypeScript` with automation experience in `Node.js`.

I excel in agile methodologies and fostering team collaboration.

Technical Skills

`JS` `TS` `CSS` `React` `NextJS` `Vue` `Nuxt` `Angular` `NodeJS` `ReduxTK` `Vite`
`Webpack` `Nx` `SCSS` `PostCSS` `Docker` `Jest` `Vitest` `MaterialUI` `RadixUI` `AntD`
`StyledComps` `D3js` `ApolloClient` `ThirdWeb` `TradingViewCharts`

Experience

Lead Frontend Developer @ Xyro   *1 yr 11 mos (Jan'23 — Nov'24)*
Gamified crypto-trading platform #startup #web3 | Remote, full-time

Project: xyro.io

Stack: React, TypeScript, Apollo Client (GraphQL), RadixUI, Trading View Charts, ThirdWeb/Wagmi, FSD

- Developed key features:
  - 3 gaming modes, while maintaining and enhancing all 5
  - Fast and seamless realtime price chart Demo ▶(https://bit.ly/cv-demo-1)
  - Complex authentication flow: OAuth, Web3, Referral codes and login by NFTs
- Created documentation and screen recordings to enhance team understanding of the code
- Designed a flexible architecture (FSD-like) and selected the technical stack for the application
- Ensured the consistency of the design system despite change of the design team, project pivot, and transition to a mobile audience
- Increase team's DevEx by implementing AI tooling, unit testing, linting, formatting and utilizing bots for easy PR reviews and task assignments

Frontend Developer @ Vilantis.ai   *8 mos (Apr'22 — Dec'22)*
European outsource company | Remote, contractor

Projects: service for American clinic patients (next-health.com), website with statistics of Lithuanian companies (statometras.lt)

Stack: Nuxt.js, Next.js, React, Vue, Charts.js, GraphQL

- Developed complex booking forms for consultations and treatment appointments
- Accelerated development and maintainbility:
  - Implemented strict typing via `JSDoc` without transitioning to `TS` to reduce amount of new bugs

- Simplified the integration of a new API by implementing auto-generation of types from the backend
- Updated the legacy project (Nuxt2/JS) for better compatibility with libraries and documentation

■ **Frontend Developer @ 12 Storeez**　　　　　*1 yr 5 mos (Aug'20 — Jan'22)*
Clothing brand with online store | Remote, full-time

Project: internal logistics service for managing order delivery across multiple countries

Stack: Angular (13), Nx, Ngrx, RxJs, Node.js, gRPC, MaterialUI

- Developed a frontend for the internal logistics service from scratch
- Conducted team retrospectives → made it easier to prevent burnout and acknowledge improvements
- Improved the accuracy and speed of the team's poker planning (15 minutes instead of 30+)
- Organized product demos with stakeholders, which clarified requirements prior to release
- Curated and updated the backlog for feature prioritization

■ **Frontend Developer @ Semrush**　　　　　*1 yr (Aug'19 — Jul'20)*
Leading online visibility management SaaS platform | Office, full-time

Project: internal service for setting goals in company units (similar to OKR)

Stack: React, Redux, TypeScript, D3.js

- Developed an interactive organizational structure with a map of departments and teams (D3, React)
- Optimized the sprint planning estimation approach and implemented it with an Agile coach

■ **Markup Developer @ Noveo**　　　　　*1 yr 4 mos (Aug'17 — Dec'18)*
Outsource company | Office, full-time

■ **Markup Developer @ Armaseti**　　　　　*1 yr 2 mos (Jul'16 — Aug'17)*
Email marketing | Office, full-time

Rest activities

I enjoy giving talks (>30), have spoken at: PiterCSS Meetup, PiterPy Meetup, Burning Lead, Kolesa Conf, Vas3k.Club. You can watch some of them here(bit.ly/martyn-talks).

I contribute to open-source projects like Obsidian, Raycast, VSCode, and React libraries.

Pet Projects

- Pokoy.app: A meditation timer app — Product Hunt
- Marathons TG bot(bit.ly/hammers-of-time): Bot for collective learning marathons — Github
- Markdown to CV generator: CLI-tool to get CV from markdown — Github
